Corps' Civilian Deputy Awarded third highest DA Honorary Award

October 8, 2004

Charleston, S.C. — Bill Stein, U.S. Army Corps of Engineer's Charleston District's Deputy District Engineer for Project Management, was presented the Superior Civilian Service Award by Col. Michael Walsh, the USACE South Atlantic Division Commander.

The Superior Civilian Service Award is the third highest Department of the Army honorary award granted by any Commander (Major General and above) or civilian equivalent.

The award was given to Stein for his professional initiative, leadership, and contributions performed in support of the Corps' Project Management Business Process (PMBP) initiative program from June 2001 to June 2003. He performed a critical role in the development and deployment of the USACE Business Processes and the P2 automation information system.

The Project Management Business Process was established as the business process for USACE to continue as the most effective, agile, and productive public design and construction organization in the world.

P2 is a state-of-the-art corporate AIS using commercial-off-the-shelf software to be an enabler in applying our business processes for all USACE work

"Stein's exceptional credibility, competency and actions contributed to building shared understanding among the workforce of what managing projects using PMBP means," wrote Lt. Gen. (ret) Robert B. Flowers, former USACE Commander in the award he granted to Stein.
